

Vera Klimenko

Software Engineer | Arlington, VA | (703) 445-2891 | vera.klimenko@email.com

SKILLS

Python · JavaScript · REST APIs · LLM Integration · Prompt Engineering · AWS (EC2, S3) · PostgreSQL · Git · Agile · Government Systems · Data Processing

EXPERIENCE

Software Engineer, Department of Transportation IT Services

March 2024 – Present | Washington, DC

- Contributed to a Python-based document processing system that ingested 500+ permit applications monthly; integrated OpenAI API to auto-classify permit types, reducing manual categorization by 40%
- Built REST endpoints for a public-facing licensing status portal used by 12,000+ monthly users; worked with backend team to optimize query performance
- Collaborated with policy analysts and procurement teams to translate requirements into technical specifications; attended weekly stakeholder meetings to validate feature scope
- Implemented prompt templates and evaluation scripts for LLM classification tasks; documented edge cases and helped improve accuracy from 78% to 86% over two sprints

Junior Developer, Virginia State Health Authority

June 2023 – February 2024 | Richmond, VA

- Developed data validation modules for a statewide health reporting system; processed and cleaned CSV files containing 2M+ records using Python pandas
- Assisted in migrating legacy SQL queries to new reporting pipeline; supported QA testing to ensure data integrity across three state regions
- Wrote unit tests and documentation for utility functions used by three other developers on the team

Internship: Full-Stack Development, Civic Tech Initiative

January 2023 – May 2023 | Raleigh, NC

- Built frontend components in React for a public records request tracker used by county offices
- Deployed static assets to AWS S3; assisted with database schema design for PostgreSQL backend

EDUCATION

B.S. Computer Science, University of North Carolina at Chapel Hill, 2023
