

Dashiell Monroe

Senior Fintech Solutions Architect

(678) 412-5893 | dashiell.monroe@email.com | Atlanta, GA | [linkedin.com/in/dashiellmonroe](https://www.linkedin.com/in/dashiellmonroe)

PROFESSIONAL SUMMARY

Results-driven fintech professional with expertise in payments infrastructure and emerging AI technologies. Proven track record in evaluating and integrating cutting-edge tools across financial systems. Passionate about staying current with industry innovations and translating technical capabilities into business value.

EXPERIENCE

Senior Fintech Solutions Architect

PaymentVault Technologies | Atlanta, GA | March 2023 – Present

- Large language models (LLMs), GPT-4, Claude, and prompt engineering frameworks
- Payment processing APIs: Stripe, Square, and internal ledger systems
- Machine learning model evaluation and selection criteria
- Vector databases, embeddings, semantic search implementations
- Retrieval-augmented generation (RAG) architecture patterns
- Python, TypeScript, FastAPI, and Node.js backend frameworks
- Cloud infrastructure: AWS Lambda, DynamoDB, S3, CloudWatch
- Docker containerization and microservices architecture discussions
- Blockchain and cryptocurrency integration research
- Compliance frameworks: PCI DSS, GDPR, SOX requirements
- Agent-based systems and autonomous workflow concepts
- Data pipeline tools: Apache Kafka, Apache Spark considerations
- PostgreSQL and MongoDB database design
- CI/CD platforms: GitHub Actions, Jenkins pipeline configuration
- Monitoring and observability: DataDog, New Relic dashboards

Fintech Integration Specialist

MercantileHub Solutions | Charlotte, NC | July 2021 – February 2023

- Payments ecosystem mapping and vendor evaluation matrices
- OpenAI API integration patterns and cost analysis
- Real-time settlement systems and reconciliation workflows
- Machine learning operations (MLOps) platform research
- TensorFlow, PyTorch, and scikit-learn model frameworks
- REST API design and GraphQL schema development
- Database migration planning and schema optimization
- Authentication protocols: OAuth 2.0, JWT token management
- Content management systems and workflow automation
- LangChain and semantic kernel framework evaluation
- Time-series data analysis and anomaly detection concepts
- Multi-tenant SaaS architecture patterns

- Jupyter notebooks and exploratory data analysis
- Prompt injection vulnerabilities and safety considerations
- Payment reconciliation algorithms and exception handling

Junior Developer

Pinnacle Digital Services | Raleigh, NC | August 2019 – June 2021

- Python scripting and automation utilities
- JavaScript fundamentals and DOM manipulation
- HTML5, CSS3 web standards
- Git version control workflows
- SQL query optimization
- REST API consumption and integration
- Testing frameworks: Jest, Pytest, unittest
- Agile methodology and sprint planning
- Technical documentation and code comments
- Debugging and troubleshooting techniques

TECHNICAL SKILLS

AI & Machine Learning: ChatGPT, Anthropic Claude, Cohere, Gemini, Mistral, Llama 2, Hugging Face Transformers, LangChain, LlamaIndex, AutoGPT, BabyAGI, fine-tuning methodologies, retrieval-augmented generation, semantic search, vector embeddings, prompt optimization

Cloud & Infrastructure: AWS (EC2, S3, Lambda, RDS, DynamoDB, SQS, SNS), Google Cloud Platform (Compute Engine, BigQuery), Azure services, Docker, Kubernetes, Terraform, CloudFormation, serverless architecture patterns

Programming Languages & Frameworks: Python, JavaScript, TypeScript, Java, Go, FastAPI, Flask, Express.js, Django, React, Vue.js, Spring Boot

Data & Analytics: Apache Spark, Apache Kafka, Airflow, dbt, Looker, Tableau, Metabase, SQL, NoSQL, data warehousing concepts, ETL pipelines

Payments & Financial Systems: Stripe API, Square Platform, ACH processing, wire transfer protocols, PCI compliance, SWIFT standards, tokenization, settlement systems

DevOps & Monitoring: Jenkins, GitHub Actions, GitLab CI, ArgoCD, Prometheus, Grafana, ELK Stack, Splunk, DataDog, New Relic

Security & Compliance: OAuth 2.0, JWT, encryption algorithms, TLS/SSL, OWASP guidelines, regulatory frameworks, secrets management, audit logging

EDUCATION

Bachelor of Science in Computer Science

Georgia Institute of Technology | Atlanta, GA | May 2019
