

Lucas Ferreira

AI Engineer | Agent Systems & Healthcare Tech

São Paulo, Brazil | +55 11 98765-4321 | lucas.ferreira@email.com

EXPERIENCE

Senior AI Engineer, Diagnóstica Labs

March 2023 – Present

- Shipped clinical decision support agent serving 47 hospitals; processes 12,000+ patient cases monthly in production
- Built multi-turn diagnostic orchestration system with tool calling to EMR APIs, lab result databases, and treatment guidelines; agent chains reduce clinician review time by 38%
- Designed memory persistence layer for patient context across conversation sessions; implemented fallback routing for ambiguous cases with escalation to senior physicians
- On-call for production incidents; established monitoring dashboards tracking agent hallucination rates and API latency; resolved critical integration failure with hospital pharmacy system in 4 hours
- Presented agent capabilities and failure modes to hospital C-suite and compliance teams; trained 200+ clinical staff on system boundaries and when to override recommendations

AI Systems Engineer, BioPharma Insights

June 2022 – February 2023

- Launched clinical trial matching agent connecting 8,000+ patients to active studies; live in 12 research centers, 2,100+ matches in first year
- Integrated with third-party genomic testing APIs, clinical trial databases, and patient intake systems using tool-use patterns; managed context windows for complex genetic profiles
- Built feedback loop for iterating on match accuracy post-launch; collaborated with trial coordinators and patient advocates to refine ranking logic
- Owned deployment pipeline and monitoring; implemented circuit breakers for external API failures

ML Engineer, Innovare AI

August 2021 – May 2022

- Developed prototypes for healthcare NLP applications

SKILLS

Python, LangChain, Claude API, tool use & function calling, hospital EMR systems, FastAPI, PostgreSQL, production monitoring
