

Rafael Duarte

AI Infrastructure Engineer | San Antonio, TX | (210) 584-7391 | rafael.duarte@email.com

Core Skills

Python · LLM APIs · Agent Orchestration · FastAPI · PostgreSQL · Docker · AWS · Claude/GPT Integration · Real-time Monitoring · Incident Response · gRPC · Vector Databases · Stakeholder Communication

EXPERIENCE

Senior AI Engineer | Helix Automation Systems | Austin, TX | *Feb 2023 – Present*

- Architected and shipped multi-agent workflow system for document processing; now handles 12K+ documents daily across 40+ enterprise clients with 99.2% uptime
- Owned on-call rotation for production infrastructure; reduced mean incident response time from 45min to 12min through custom monitoring dashboards and alert optimization
- Implemented tool-calling pipeline for agents to query company APIs, update CRM records, and trigger downstream workflows; integrated with Salesforce and internal legacy systems via REST and gRPC
- Presented quarterly performance metrics and roadmap to C-suite; managed feature requests from top 5 accounts including 2-week sprint to add custom agent memory persistence

AI Systems Engineer | DevStream Labs | Denver, CO | *Jun 2021 – Jan 2023*

- Developed agentic code-review system deployed to production serving 60+ internal developers; agents autonomously analyzed pull requests, ran tool-based linting checks, and escalated complex issues to humans
- Managed agent state using PostgreSQL + Redis; implemented orchestration logic for multi-turn interactions and context window management across 5M+ monthly API calls
- Debugged and iterated on live production agent behavior; reduced false positive escalations by 34% through iterative prompt refinement and memory optimization
- Collaborated with Product and DevOps teams on deployment strategy; trained non-technical stakeholders on agent capabilities during sprint reviews

Machine Learning Engineer | CloudBridge Analytics | Denver, CO | *Aug 2020 – May 2021*

- Built initial LLM integration prototype that evolved into production chatbot for customer support; 2K concurrent users
