

Camila Restrepo

Production Engineer | Austin, TX | (512) 447-2931 | camila.restrepo@email.com

Senior Production Engineer with 7 years building reliable, scalable systems for media platforms serving millions of concurrent users. Expertise in cloud infrastructure, API design, and on-call operations. Proven track record shipping features that handle real-world traffic spikes and maintaining systems with 99.95%+ uptime.

EXPERIENCE

Senior Production Engineer | Silverscreen Media | Austin, TX | Feb 2023 – Present

- Architect and maintain distributed video streaming infrastructure handling 40M+ monthly active users across three continents
- Designed fault-tolerant API gateway serving 25k requests/second during peak hours; reduced latency by 35% through intelligent routing
- Led incident response team; reduced mean time to resolution from 45 minutes to 12 minutes via automated alerting and runbooks
- Built content moderation pipeline that calls third-party ML APIs for thumbnail classification; processes 2M images daily with 99.2% accuracy

Production Engineer | Wavefront Studios | Austin, TX | Jun 2021 – Jan 2023

- Managed Kubernetes clusters and microservices infrastructure supporting live event streaming (concerts, sports broadcasts)
- Owned deployment automation and blue-green rollout strategy; reduced deployment time from 2 hours to 15 minutes
- Implemented comprehensive monitoring across 60+ services; cut false-positive alerts by 60% through tuning
- On-call rotation for 24/7 operations; maintained SLA compliance through proactive capacity planning

Backend Engineer | Nexus Creative | Austin, TX | Aug 2018 – May 2021

- Built REST APIs for content recommendation system; handled 500k daily requests with sub-200ms p99 latency
- Migrated monolithic application to microservices architecture on AWS; improved system resilience and enabled independent team scaling

TECHNICAL SKILLS

Kubernetes, AWS (EC2, RDS, S3), Prometheus, PostgreSQL, Go, Python, gRPC, Terraform
