

Claire Fontaine

Senior QA Analyst | Digital Media Testing

Portland, OR 97204 | (503) 721-4396 | claire.fontaine@email.com

PROFESSIONAL SUMMARY

Quality assurance specialist with 6 years of progressive experience testing digital media platforms, streaming applications, and content delivery systems. Skilled in test automation, cross-browser compatibility validation, and real-world user scenario testing across web and mobile environments. Track record of identifying critical bugs before production release and collaborating with product and engineering teams to maintain high-quality user experiences at scale.

PROFESSIONAL EXPERIENCE

Senior QA Analyst

Prism Entertainment Group | Portland, OR | March 2023 – Present

- Led QA efforts for Prism's flagship streaming platform serving 2.4M monthly active users, managing test cycles for iOS, Android, and web clients
- Developed and maintained automated test suites using Selenium and Appium, reducing regression testing time by 35% and enabling faster release cycles
- Created comprehensive test plans and executed manual testing for video playback, adaptive bitrate streaming, and caption/subtitle rendering across 40+ device configurations
- Collaborated with content operations and backend teams to validate video encoding pipelines and ensure proper metadata delivery to end users
- Triaged and documented 200+ bugs per quarter with detailed reproduction steps, severity assessment, and impact analysis
- Mentored two junior QA engineers on testing methodologies and introduced weekly QA guild meetings to share best practices

QA Engineer

Cascade Digital Productions | Eugene, OR | July 2021 – February 2023

- Performed functional, regression, and exploratory testing on media asset management platform used by post-production studios across North America
- Built automated test framework in Python to validate file upload, transcoding, and proxy generation workflows
- Coordinated with creative and technical teams to test color correction tools, timeline synchronization, and frame-accurate export functionality
- Identified and documented critical issues affecting media ingest pipelines that were preventing timely content delivery
- Participated in smoke testing for monthly releases, covering web interface, REST API integrations, and third-party plugin compatibility
- Maintained test documentation and test case repository; improved documentation organization that reduced onboarding time for new team members by two weeks

QA Technician

Wavelength Media Solutions | Salem, OR | September 2019 – June 2021

- Executed manual and automated testing for digital advertising delivery platform handling 500M+ impressions monthly

- Validated creative rendering across browsers, resolutions, and geographic regions; verified proper ad serving logic through database queries and analytics dashboards
- Tested integration points with third-party ad networks and publishers using Postman and custom curl scripts
- Created test cases for new ad format support (interactive video, dynamic creative optimization) and documented edge cases
- Assisted in performance testing scenarios to validate platform stability during traffic spikes around major sporting events
- Supported production incident response by reproducing reported issues and working with engineers to isolate root causes

TECHNICAL SKILLS

- **Test Automation:** Selenium WebDriver, Appium, pytest, TestNG
- **Languages:** Python, JavaScript, SQL
- **Platforms & Tools:** Jira, TestRail, Azure DevOps, Jenkins, Postman
- **Methodologies:** Agile/Scrum, exploratory testing, API testing, cross-browser testing, accessibility testing (WCAG basics)
- **Media Technologies:** HLS/DASH streaming, video codecs, CDN concepts, adaptive bitrate streaming, metadata standards
- **Operating Systems:** Windows, macOS, Linux

EDUCATION

Bachelor of Science in Information Technology

Oregon State University | Corvallis, OR | 2019

Relevant Coursework: Software Quality Assurance, Database Systems, Web Development, IT Project Management

CERTIFICATIONS & TRAINING

- ISTQB Certified Tester Foundation Level (CTFL) | 2022
- Completed Selenium WebDriver bootcamp through Tech Training Academy | 2022

ADDITIONAL NOTES

Passionate about improving user experience through rigorous testing. Stayed current with industry trends in streaming media through membership in the Streaming Video Alliance community. Familiar with basic AI concepts as they apply to content recommendation systems, though not a primary focus area.
