Healthcare Systems: Electronic Health Records (EHR), HIPAA compliance, claims processing, patient demographics, clinical workflows, healthcare data standards (HL7, FHIR basics)

Tools & Platforms: Salesforce, Looker, Google Analytics, Snowflake, PostgreSQL, Jira, Confluence, Git basics

Soft Skills: Cross-functional collaboration, stakeholder management, documentation, process improvement, training

PROFESSIONAL EXPERIENCE

Senior Data Analyst | MediVista Solutions | Nashville, TN | March 2023 – Present

- Partner with clinical and operations teams to design dashboards tracking patient admission trends, readmission rates, and department utilization; dashboards accessed by 40+ hospital staff daily
- Develop and maintain 15+ recurring SQL reports on claims data, insurance denials, and billing cycles; identified \$240K in annual revenue leakage through pattern analysis
- Built Tableau workbooks for executive leadership showing bed capacity forecasting and surgical throughput metrics; presented findings in monthly board reviews
- Collaborated with EHR vendor to troubleshoot data integration issues; reduced data reconciliation time from 8 hours to 2 hours per week
- Mentored two junior analysts on SQL optimization and healthcare data governance; documented best practices in internal wiki
- Conducted exploratory analysis on patient readmission patterns using statistical methods; results informed new discharge protocols

Data Analyst | Cornerstone Health Networks | Memphis, TN | June 2021 – February 2023

- Queried and analyzed electronic health records across seven primary care clinics serving 35,000+ patients; generated monthly performance reports on quality metrics
- Built automated Excel and Power BI dashboards for scheduling, no-show rates, and appointment utilization
- Supported claims and billing team with ad hoc analysis of denied claims; categorized denial reasons and presented trends to management
- Cleaned and standardized patient demographic data; resolved ~500 duplicate records in database
- Assisted with migration of legacy reporting system to Snowflake; tested data accuracy post-migration and validated 99.2% match rate
- Prepared documentation for HIPAA audits; ensured all analytic workflows met compliance requirements

Business Intelligence Associate | PharmaTech Advisors | Louisville, KY | August 2019 – May 2021

- Supported analytics team in designing reports for pharmaceutical supply chain and inventory management
- Created SQL queries to extract medication usage patterns and cost trends from operational databases
- Built interactive Looker dashboards monitoring warehouse operations and distribution metrics
- Worked with stakeholders to gather requirements and translate business questions into analytical tasks

- Maintained data quality standards and identified discrepancies in supplier invoicing data
- Contributed to process mapping documentation; recommended workflow optimization that reduced manual data entry by 30%

Data Reporting Specialist | Healthwise Services | Knoxville, TN | July 2018 – July 2019

- Managed daily and weekly operational reports using SQL and Excel for insurance claims processing department
- Monitored data quality and flag anomalies in patient billing records; escalated issues to IT when needed
- Created training materials for staff on new reporting tools and data access procedures
- Assisted with ad hoc analysis requests from insurance and compliance teams

EDUCATION

Bachelor of Science in Information Systems | University of Tennessee at Knoxville | 2018

Relevant Coursework: Database Management, Business Analytics, Data Mining, Healthcare Information Systems

CERTIFICATIONS & TRAINING

- HIPAA Compliance for Healthcare Professionals (2022)
- Tableau Desktop Specialist (2023)
- Google Analytics Certification (2020)
